Netting Professionals, LLC

UV DURA-Dip Paint Treatment for Sports Netting

UNIQUE/SOLE PROVIDER

MATERIALS and PROCEDURE – 3 PHASE TREATMENT PROCESS:

1. **Black Varnish-Based paint**
2. **3 Phase:**
 - a. **Phase 1: Mixed and agitated via Pump Process**
 - b. **Phase 2: Submersion and soak to ensure complete fiber and knot penetration**
 - c. **Phase 3: Reverse pump for complete coverage and draining**

ADVANTAGES and CAPABILITIES

1. Greatly improves weather resistance (outdoor)
2. 3 Phase process prevents treatment separation
3. 3 Phase process ensures proper mixture of varnish and resin
4. Added abrasion resistance
5. Increased breaking strength (up to 20%)
6. Better color-stay ability. (Netting won't fade to gray)
7. Prevents slipping by setting and bonding knots together
8. Prevents fraying and puffing at net edges
9. Adds stiffness and dead-ball effect
10. Sheds water, dirt, dust, ice, snow
11. Inhibits mold, mildew, fungus, lichen growth
12. Will not wash out like water-based latex paints and treatments

HISTORY and DEVELOPMENT

1. Developed from many years of use on Marine Shrimp Net Trawls
2. Proven to resist the harsh elements of marine environments
3. Special chemical formula perfected over 100 years of testing and use
